

Parent Instructional Guide

Math & Reading

Companion Work Text & Student Practice Book

At-Home Learning

For families using STAAR MASTER® products to continue student-learning while at home, the makers of STAAR MASTER® have assembled this instructional guide that provides parents with an organized way of using the work texts in our At-Home Student Packs. In this guide, you will find a sample schedule to follow with a recommended pace in which to cover the material. Each day is outlined for you with the specific math and reading pages from the work texts for your student to complete. The work texts can be self-directed, so your student can work independently.

For your reference, also included are the academic standards to which the material in the work texts was written. This ensures students are learning from material that aligns with what the state of Texas has determined each student at each grade level should know.
